

The MV-LX

*The return of spacious,
chauffeur-driven luxury.*

The first rule of luxury is comfort.

That is the entire rationale behind the MV-LX. The perfect modern Chauffeur-Driven Vehicle.

A 56" door height and low 15" step allow for a graceful and easy entry and exit, particularly in evening attire and high heels. You just step inside. The large and comfortable cabin meets ADA guidelines,

and is as accommodating for one or two clients as for six; with easy ramp access, it comfortably fits a client in a wheelchair and four companions. The MV-LX is the completely versatile limousine. Inside, luxury abounds, with armchair comfort, French-stitched supple leather seating, and walnut trim. All conveniences are aboard,

with the available refreshment center, power outlets, and entertainment system.

Six-passenger comfort. Huge luggage capacity. Wheelchair accessible and environmentally responsible with its compressed natural gas option. The MV-LX is the perfect chauffeur-driven vehicle. Because comfort is the ultimate luxury.

Plus all the amenities you expect of true first-class accommodations.

Spacious main seating area is wide enough for four passengers, sinfully comfortable for two or three.

Low 15" step-in height for easier entry and exit.

Convenient rear power outlets.

Custom walnut trim throughout.

Luxurious French-stitched leather.

Beverages chill in console cooler.

Removable rear-facing seat brings total seating capacity to six.

Powered telescoping ramp disappears beneath the floor. Door opening is a cavernous 56" by 36".

MV-LX easily accommodates any size of wheelchair or scooter.

First class access and comfort for every client—in one vehicle.

The MV-LX features a powered telescoping ramp that disappears beneath the floor and is protected from the elements. So you can provide true VIP treatment to everyone — in a single vehicle that meets or exceeds ADA guidelines. And just as important as the MV-LX's unsurpassed accessibility is its versatility. It has comfort-

able seating for up to six. More cargo capacity than any luxury sedan. And an optional low-emissions CNG alternative fuel powertrain with a range of 250 miles. So you don't have to compromise passenger comfort, luggage space, environmental responsibility or range. It truly is the future of chauffeur-driven luxury.

Base MV-1 vehicle is provided by:
The Vehicle Production Group LLC, 1395 Brickell Avenue, Suite 630, Miami, FL 33131
Main Line: (786) 230-2100, Email: sales@vpgautos.com, VPGautos.com

Interior design and upgrade of MV-LX by:
Auto Concept of NY, LLC, 428 Peninsula Blvd, Hempstead, NY 11550, (516) 385-6945

Giant storage area accommodates six full-size suitcases and two golf travel bags. And low loading height eliminates the painful "up and over" of sedan-based limousine trunks.
